

VACUUM CLEANER AND AIR BLOWER

User manual

Model: Airbird DUO VB1

Introduction

Thank you for your purchase! We hope you are satisfied with your Airbird DUO and that it helps you keep your surroundings clean and tidy. If you have any feedback, please don't hesitate to contact us – we would love to hear from you.

Product overview

Airbird DUO is a powerful and compact cleaning tool that combines a vacuum cleaner and an air blower in a single device. It is designed for versatile use and easily vacuums surfaces such as sofas, blankets, car seats, windows, and rugs.

The blower function quickly removes dust from desks, keyboards, computer chassis, air conditioners, and much more.

Whether you're at home, traveling, camping, or on the road with a motorhome, the Airbird DUO is the perfect portable solution to keep your environment clean and dust-free – wherever you are.

Included in the package

Airbird DUO, Multifunctional Brush, Type-C Charging Cable, Nozzle for Deflation, User Manual, Waterproof storage bag, Dust blowing tube.

Dimension: 26 × 5,5 × 5,5 cm

Weight: 449,5 g

Overview

[g] Vacuum Brush

[h] Tube for dust blow

[j] Deflation nozzle

Precautions

- Please inspect the product before use. If you notice any abnormalities, do not use it.
- For optimal performance, ensure the air intake is not blocked. If airflow is obstructed, the device will automatically shut off. Remove the obstruction and restart the device by pressing the On/Off button for 3 seconds.
- If you hear abnormal noises or the device becomes too hot during operation, shut it down immediately and allow it to cool before using it again.
- Avoid exposing the device to moisture, sand, or dropping it.
- Do not store the product in extremely hot or cold environments, as this may shorten its lifespan.
- Do not use harsh chemicals, cleaners, or detergents to clean the product's surface.
- Never throw the product into fire or dispose of it improperly, as this can cause serious safety hazards.
- Never leave the device unattended while in use.

Usage guide

1. On/off

Short press one time for medium effect. Short press two times for maximum effect.
When you short press the third time, the machine turns off.
The vacuuming-/deflation- and blower function works simultaneously.

2. Battery Indicator

When the indicator light is green, it means the battery is more than 30%.
When the indicator light is red, it means the battery is below 30%, please charge it as soon as possible.

3. Charging with Type-C Cable

The charging input for Airbird DUO is 5V/2A. Use your charging cable and power adapter (not included) to charge the device.

During charging the battery indicator will blink. When fully charged the light turns to solid green.

Please note: The device cannot be used during charging.

4. Vacuum and Dust Blow

Dust Blow:

Connect the blower tube [h] to the left blower port [f]. Connect to blow dust.

Vacuum:

Connect the vacuum brush [g] to the right port [a] to vacuum.

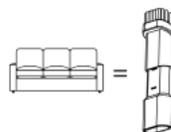

5. Vacuum Extraction

Pumping:

Connect the nozzle [j] to the right suction port [i] to start pump.

Application scenarios

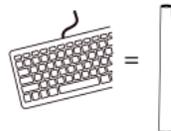

Vacuum Brush

For vacuuming cars, sofas, blankets, quilts, and similar items, choose the large brush and attach it to the upper inlet.

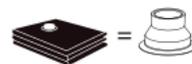

Vacuum Nozzle

For vacuuming car seats, windows, and floor mats, use the brush with the stretch clip and install it in the topmost inlet.

Dust Blowing Tube

To clean keyboards, air conditioners, or other dust-collecting items, attach the blowing tube to the bottom inlet.

Deflation Nozzle

For deflating items such as vacuum-sealed clothes and quilt storage bags, unscrew the translucent cover and install the rubber nozzle on the upper inlet.
